PCSC sample in Prolog

Here is the PCSC sample in Prolog language I promised in PC/SC sample in different languages.

Renaud Mariana wrote a PC/SC wrapper for GNU Prolog. The latest version is 1.01 dated 2003 and is available in GNU Prolog contributions [PC/SC Lite interface for GNU Prolog](#).

Installation

You first need to install GNU Prolog:

```
apt-get install gprolog
```

Then apply some patches to the wrapper project, see my [mail](#) in the users-prolog mailing list. Then the compilation succeeds without any problem.

```
gplpcsc/contribs/gplpcsc$ make
gplc -c -C "-Wall -g `pkg-config --cflags libpcsc-lite`" pcsc/muscle_c.c
gplc -o testapdu pcsc/muscle_c.o -L "`pkg-config --libs libpcsc-lite` -lcrypto -lpthread" te
stapdu.pl util_pcsc/util.pl
```

Source code

```
:- include('pcsc/muscle').

start :-
    scard_establish_context,
    scard_connect,

    % print ATR data
    scard_status(_, Atr),
    print('ATR: '), print_hex_list(Atr), nl,

    % enable trace
    scard_enable_verbose(true),

    Commande = [0,0xA4,4,0,0xA0,0xA0,0,0,0,0x62,3,1,0xC,6,1],
    scard_transmit(Commande, _ApuOut1, _Sw1, _Time1),

    print_hex_list(_ApuOut1),
    print_hex_list(_Sw1), nl,

    scard_transmit([0,0,0,0,0], _ApuOut2, _Sw2, _Time2),

    print_hex_list(_ApuOut2),
    print_hex_list(_Sw2), nl,
    print_ASCII_list(_ApuOut2), nl.

print_ASCII_list(L) :-
    ( list(L) ->
        print('['), '$print_ASCII_list'(L,[]), print(']')
    ;
        print('print_ASCII_list error, argument is not a list')
```

```

Conclusion

Nothing more to add. If you are a Prolog user you may be interested by this wrapper.
