PCSC sample in PHP

In PC/SC sample in different languages I "promised" to give the implementation of the same sample program in many different programming languages. I am now less motivated and some languages have not yet been treated. PHP is one of them.

Wrapper for PHP

SCardSCR is a PC/SC wrapper for PHP4. As indicated on the web page:

SCardSCR is a PHP4 based project, and for many (good) reasons, it primarily targets Microsoft Windows (Win32/i386).

And since I am not an expert or even user of Windows I do not think I will ever work on this wrapper. I am also not a user of PHP.

Comments

The project is dated 17/01/2005 and is for PHP4. PHP5 is available since 2004. So maybe the SCardSCR project is not really active/maintained anymore.

Note that my name is in the Credits :-)

Thanks to Ludovic Rousseau for his pcsc-tools package (C program and Perl scripts) that is the basis of most SCardSCR sample scripts.

Conclusion

I left as an exercise the writing of the `sample.php` program in PHP. If you write it just tell me so I can add it here.
